

Sweden ICT invites you to:

INTERNATIONAL TALENT MATCHMAKING

Sweden Innovation Days Nov 18th

Innovative companies, lots of talents and six Swedish Science Parks with an ICT focus come together for this autumn's greatest challenge: to find the right match!

Sweden ICT invites you to be part of Sweden Innovation Days "International Talent Matchmaking" and take the opportunity in matching your needs with the competence of international talents. Sweden Innovation Days put focus on one of the greatest technology shifts of all times; AI. Companies – as well as talents – from nine countries have been invited to participate during the three-day-long event.

HOW TO APPLY?

Register a company profile in our tool along with job ads, and future competence needs that you have identified. The more information, the better!

MATCH BY AI TOOL

Sweden Innovation Days is all about AI, so we decided to let an AI tool match your needs to the talent cv database.

TALENTS WITH HIGHEST SCORE

The six talents that get the highest score in the matchmaking, based on your needs and their competence, will be invited to a 20-minute digital interview with a representative from your company. When you find the right talent, we can guide you to the right support to relocate to Sweden.

WHEN?

The digital interviews will be arranged on November 18th.

FREE OF CHARGE

This Talent Matchmaking launch event will be free of charge for early adopters.
